## Fitness Center System

### PROBLEM STATEMENT

PLALESTRA FITNESS CENTER is a fitness center which has manual system of maintaining records. Recently, the company has planned to expand its business by renting out gym equipment. Also, the company is experiencing huge customer traffic which makes it difficult to maintain records in excel sheets. The company is facing problems involving same people taking free trial a number of times or attending paid classes for free. Also, the company has introduced new packages and increased fee for new customers. Employees find it difficult to differentiate between new and old customers and are unable to charge customers appropriately.

The company also investing in advertisement to increase the number of customers and they require an information system to assist them in these decisions.

## VISION STATEMENT

Upgrade the manual system of the fitness center to an automated computer system. Execute Information System to support and enhance day by day operation with expanded efficiency, while keeping a high level of Customer satisfaction.

## SYSTEM CAPABILITIES

- Register customers and maintain records
- Manage payments
- Book trainers and sessions for members
- Manage schedule for members and trainers as well
- Maintain information about rented equipment
- Assist management in making decisions

## BUSINESS BENEFITS

- Increase in customer satisfaction due to fast processing
- Expansion of business by handling multiple trainers and sessions
- Lead to faster and efficient management decisions
- As opposed to the manual system the proposed information system will allow a more efficient management of the fitness center

## WORK-FLOWS

### **1.0 Member Registration**

1.1 Employee asks for Customer Information

1.2 Customer provides information

1.3 Employee performs system check for previous record.

1.3.1.1 Employee asks details and valid proof to make a new record.

1.3.1.2 Customer provides details

1.3.1.3 Employee verifies the details.

1.3.1.4 System updates the record.

1.3.2 For returning customer, old profile is retrieved.

1.3.2.1 Employee ask to update info

1.3.2.2 Customer provides details

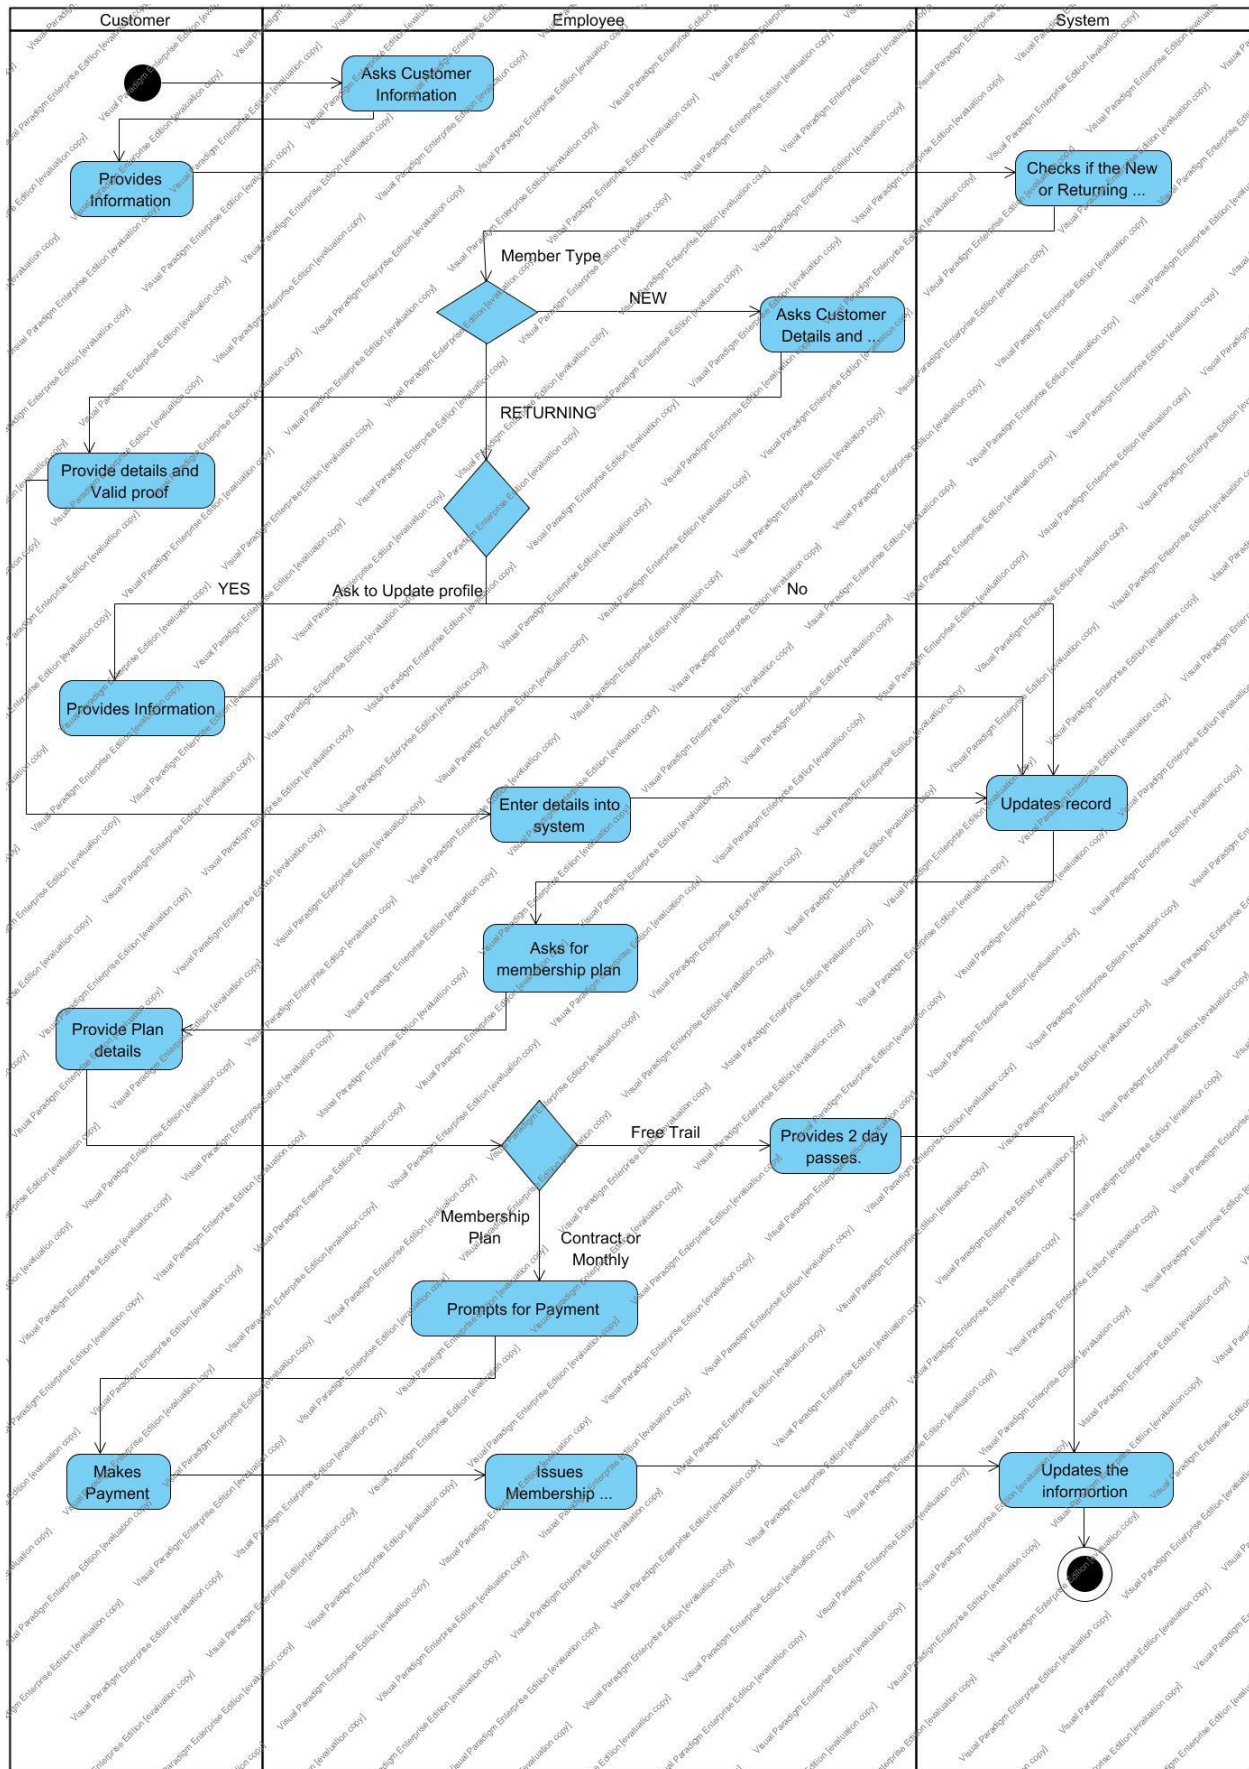

1.4 Employee asks for membership plan.

1.4.1 Customer makes payment if the membership plan is on Contract or month to month.

1.4.1.2 System updates the record

1.4.1.3 Employee activates the membership card

1.4.2 Employees provides 2 day passes if Customer wants free trial.

## 2.0 Member/Employee Check-In

2.1 Member/Employee approaches Check-in machine.

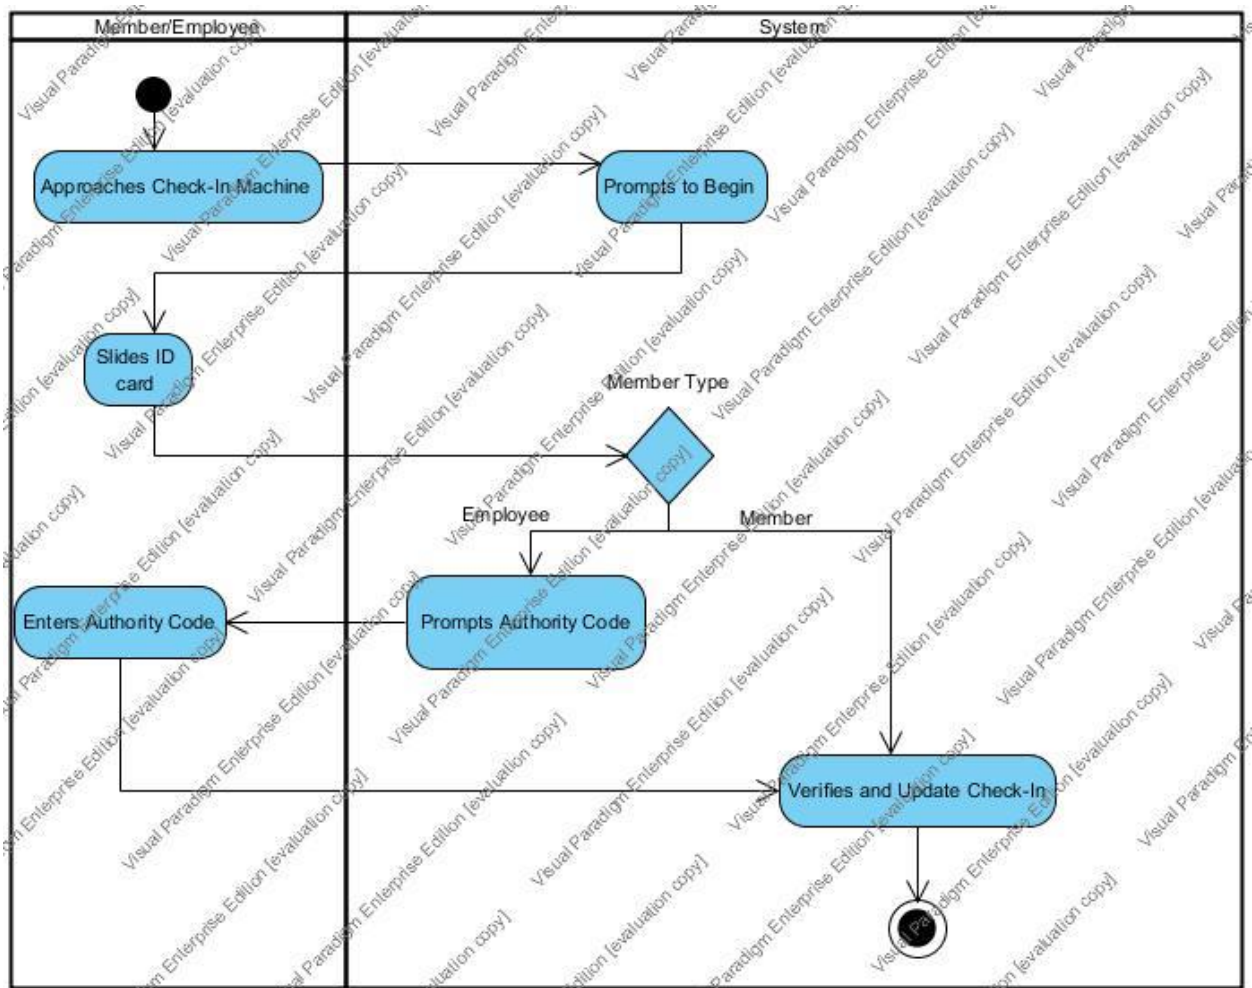

2.2 Slides the ID card.

2.3.1 For Employee, System prompts authority code.

2.3.1.1. Employees enters the authority code.

2.3.1.2 System verifies and update the check-in.

2.3.2 For Member, System update the check-in.

## 3.0 Trainer Booking

3.1 Customer asks for personal trainer.

3.2 Employee asks the classification type and schedule.

3.1 Customer provides information.

3.2 Employee enters the details into the system

3.3 System automatically shortlist the available trainers.

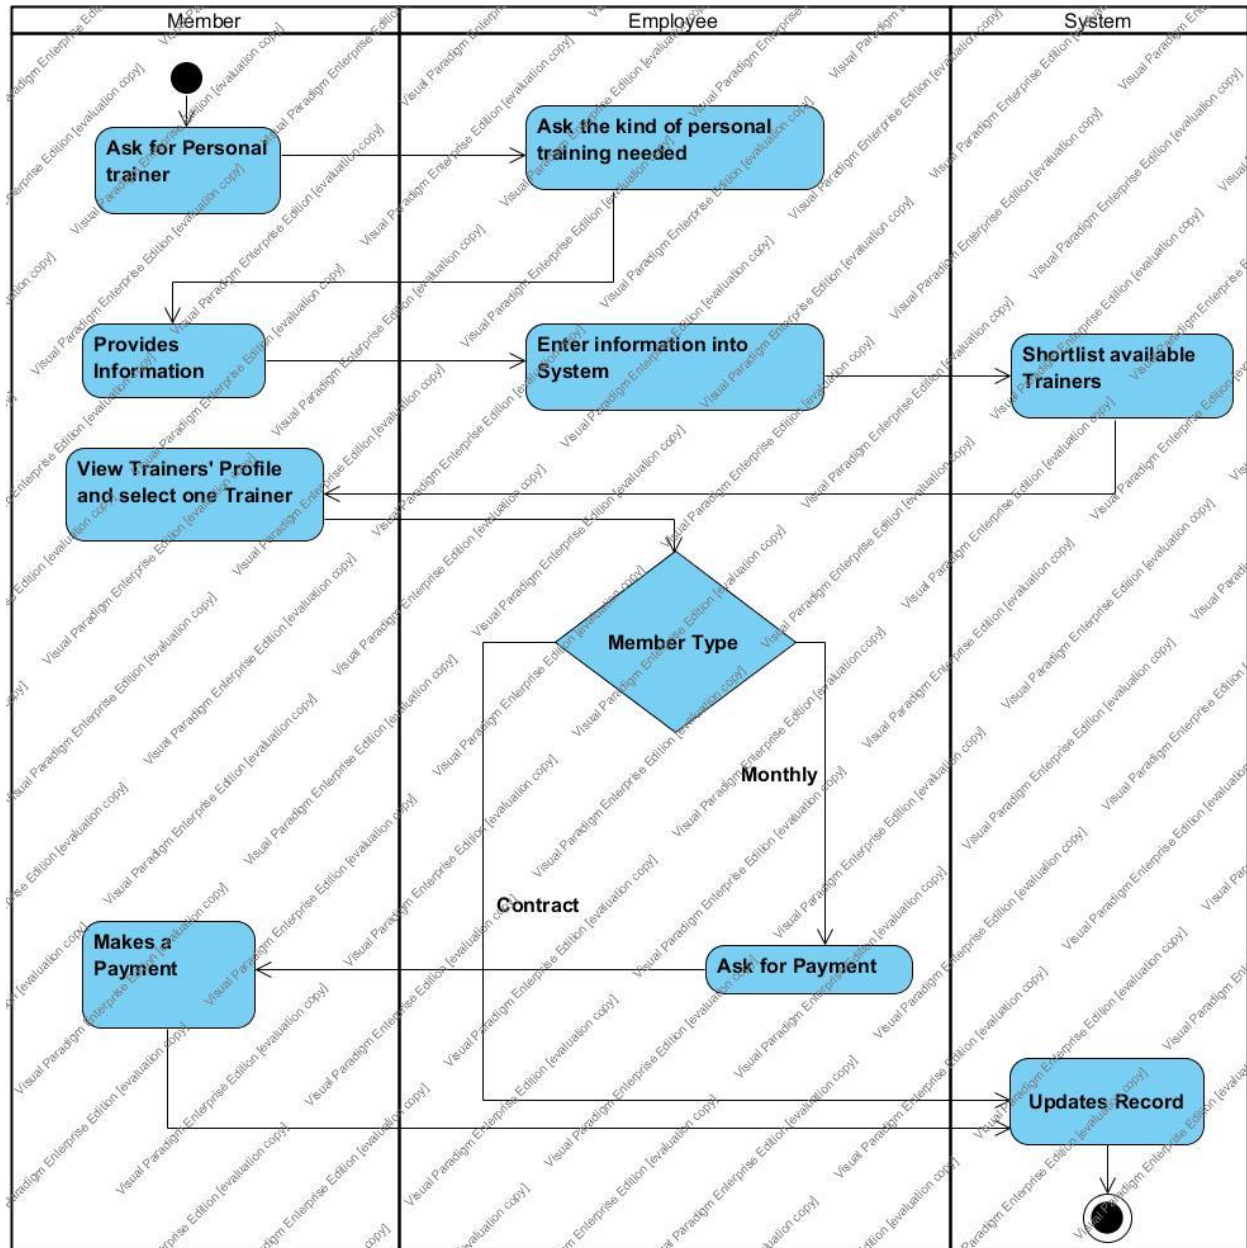

3.4 Customer selects a trainer.

3.7.1 Employee saves and updates the record into the system if the Customer is on Contract.

3.7.2 System generates total amount for the booking if the Customer on Monthly plan.

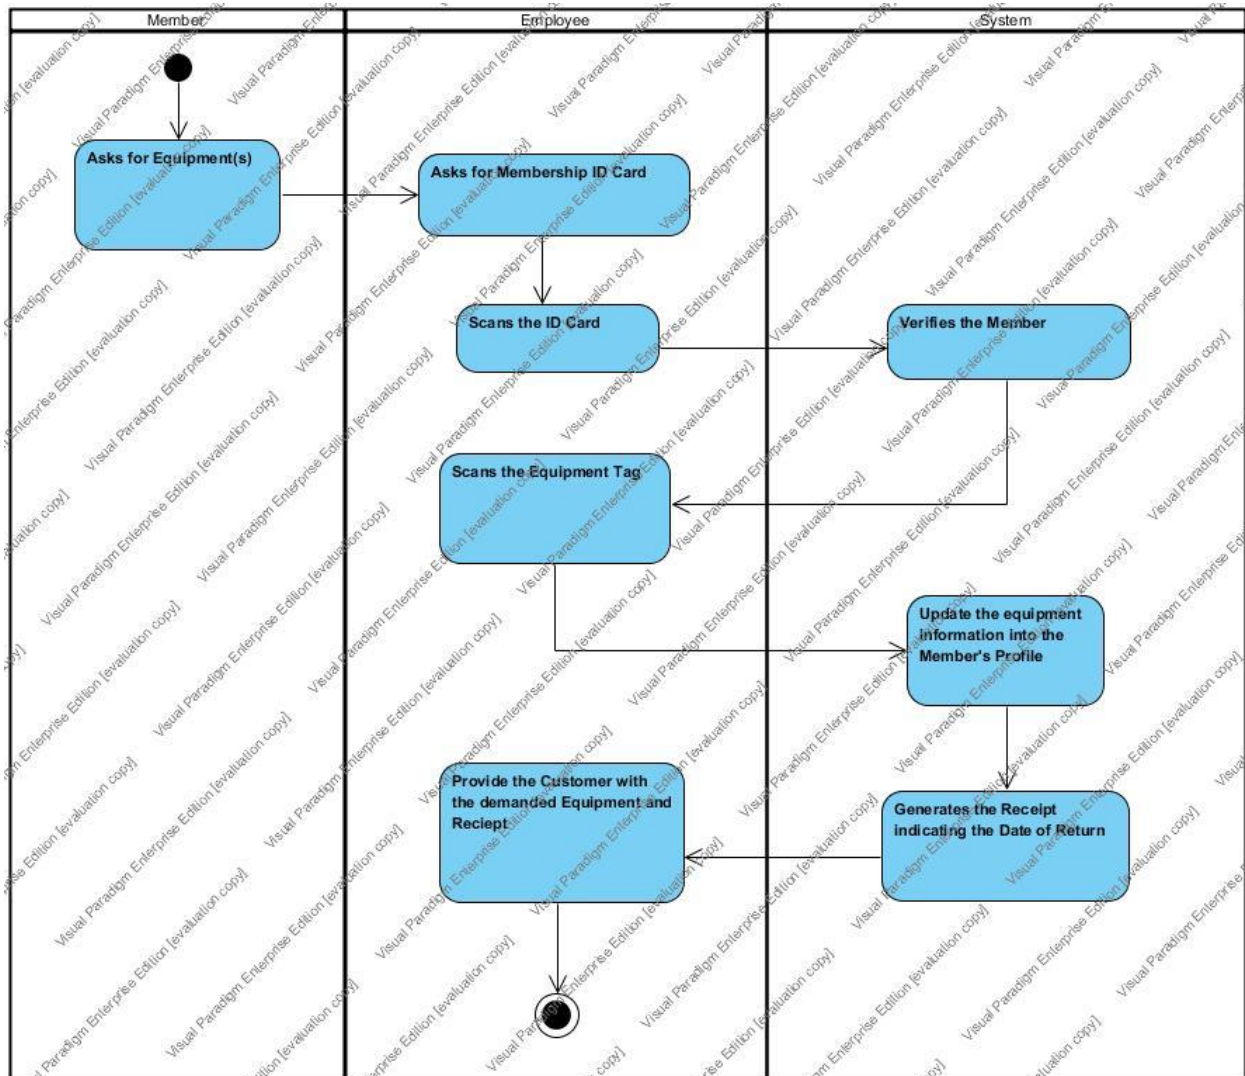

3.7.2.1 Customer makes payment.

3.7.2.2. System records the transaction.

## 4.0 Equipment Renting

- 4.1 Customer asks for an equipment(s).
- 4.2 Employee asks for Membership ID card.
- 4.3 Employee scans the ID card.
- 4.4 Employee scans the equipment tag.
- 4.5 System update the equipment information into the Customers profile.
- 4.6 System generates the receipt indicating the due date.
- 4.7 Employee gives the equipment and receipt to the Customer.

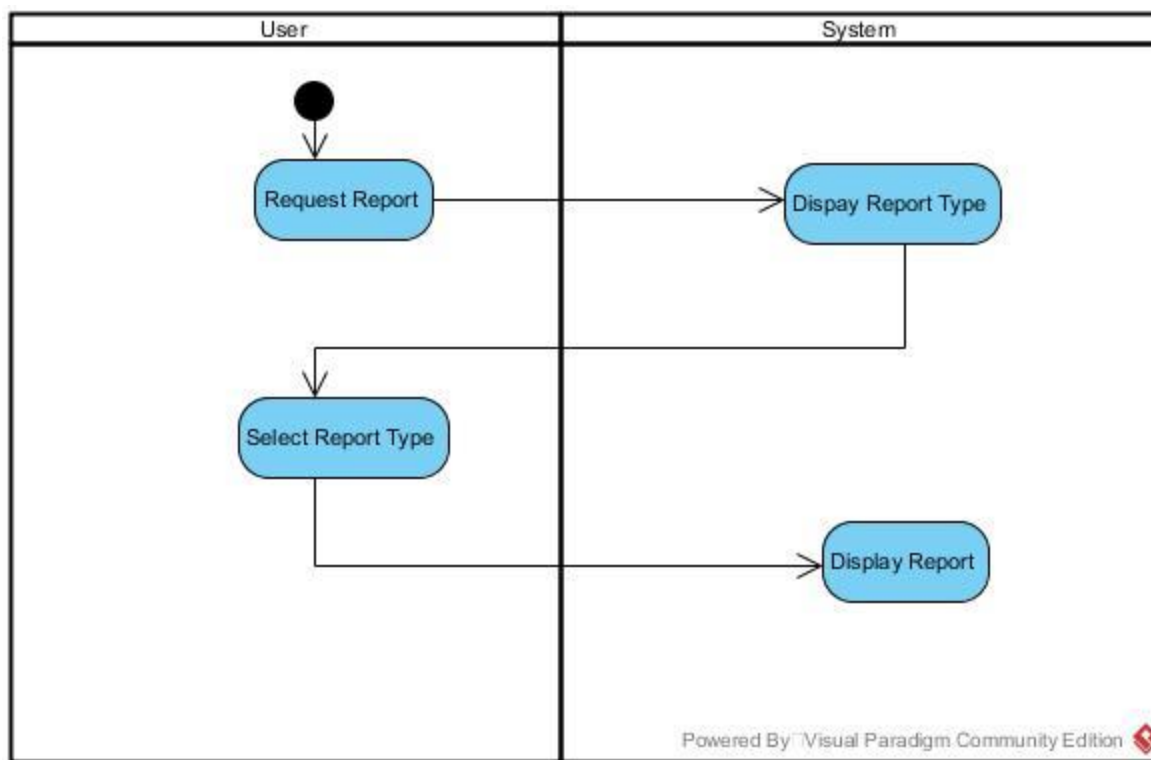

## 5.0 Patient and office reports

5.1 User (Employee or Manager) requests report.

5.2 System displays the different types of reports. (Monthly Member Reports, Monthly Staff Reports, Monthly Booking Reports)

5.3 User selects report type.

5.4 System displays the report.

## USE CASE

PROCESSES (Workflows):
1) Member Registration
2) Equipment Renting
3) Trainer booking

4) Member/Employee Check-In
5) Office Reports

The Processes correspond to the Functional areas of the Use Case Model shown below:

No.	Actor	Goal Use Case	<Include>	<Extend>	Generalization	Priority	Brief Description
1.1	Employee	Register as a member	<ul style="list-style-type: none"> <li>• Get Payment</li> <li>• Activate Membership Card</li> </ul>	<ul style="list-style-type: none"> <li>• Book trainer</li> <li>• Book Session</li> </ul>	<ul style="list-style-type: none"> <li>• Member pays monthly</li> <li>• Member is on a contract</li> </ul>	H	Employee registers customer as a new member
1.2	Employee	Register as a customer	<ul style="list-style-type: none"> <li>• Verify customer info</li> <li>• Print two day passes</li> </ul>			H	Employee registers a new customers and provides passes for free trial
1.3	Employee	Search member /customer details		<ul style="list-style-type: none"> <li>• Add as a member</li> <li>• Search all customer/member data</li> </ul>		M	Employee can search member details of a single or all members.
1.4	Employee	Maintain Payment Details		Print Payment Details		L	Employee can view or alter payment details and print them
1.5	Employee	Update member/customer details				M	Employee can modify customer or member details as required

2.1	Employee Member	Check-In.	Scan membership/staff card			M	Members or employee can check-in and mark their attendance
2.2	Employee Staff	View Member Attendance Details				M	Employee or Manager can view attendance details of members at fitness center
2.3	Manager	View Staff Attendance				M	Manager can view attendance details of staff
3.1	Employee	Book Trainer	<ul style="list-style-type: none"> <li>• Confirm Membership type</li> <li>• Check member schedule</li> <li>• Check trainer schedule</li> </ul>	<ul style="list-style-type: none"> <li>• Get Payment</li> </ul>		H	Employee books trainer for members by considering schedules of both trainer and member. Also if the member pays monthly and is not on contract then employee gets payment from member
3.3	Employee	Update training schedule	<ul style="list-style-type: none"> <li>• Check member schedule</li> <li>• Check trainer schedule</li> <li>• Get current training schedule</li> </ul>				Employee makes changes on training schedule depending on member or trainer request

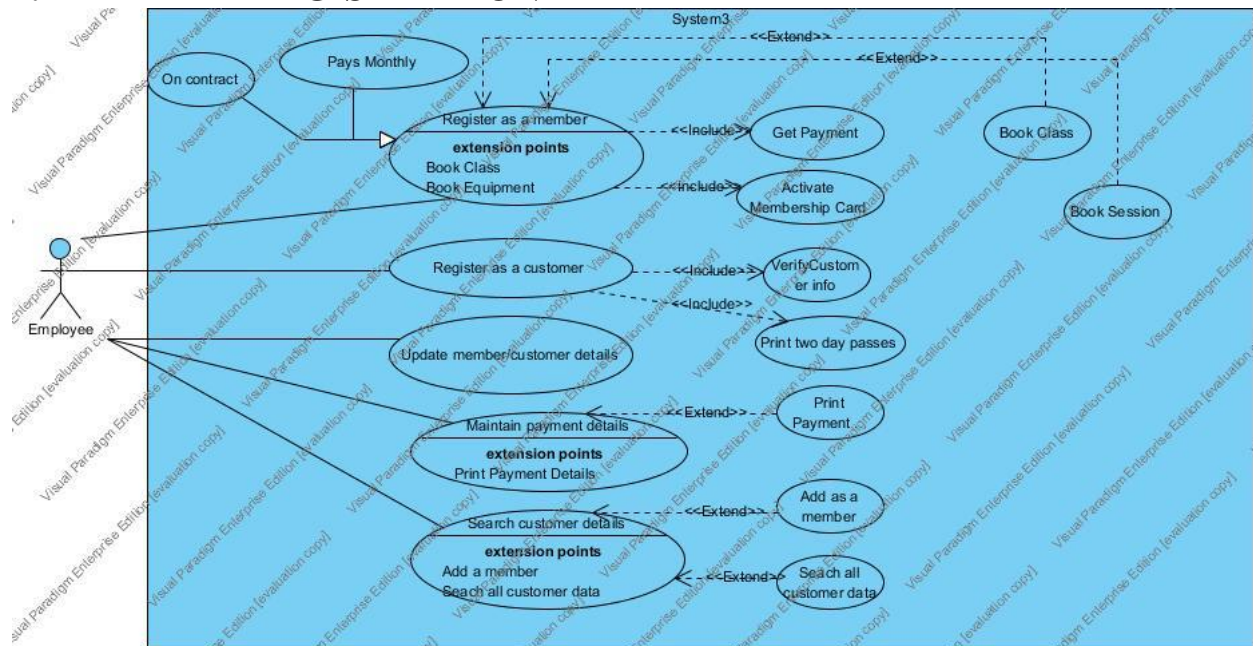

3.4	Employee	View members under a trainee				H	Employee can view members under a trainee when asked by a member or a trainee
3.5	Employee	View Trainer Details				L	Employee can view trainer details when requested by a member
3.6	Employee	Cancel Booking				L	Employee cancels training as requested by trainer or employee
4.1	Employee	Rent Equipment	<ul style="list-style-type: none"> <li>• Scan Equipment</li> <li>• Confirm Membership</li> <li>• Update on member account</li> </ul>	Generate receipt		H	Employee rents equipment by scanning the equipment and confirm the membership status of member. Employee then updates the rented equipment on member's account.

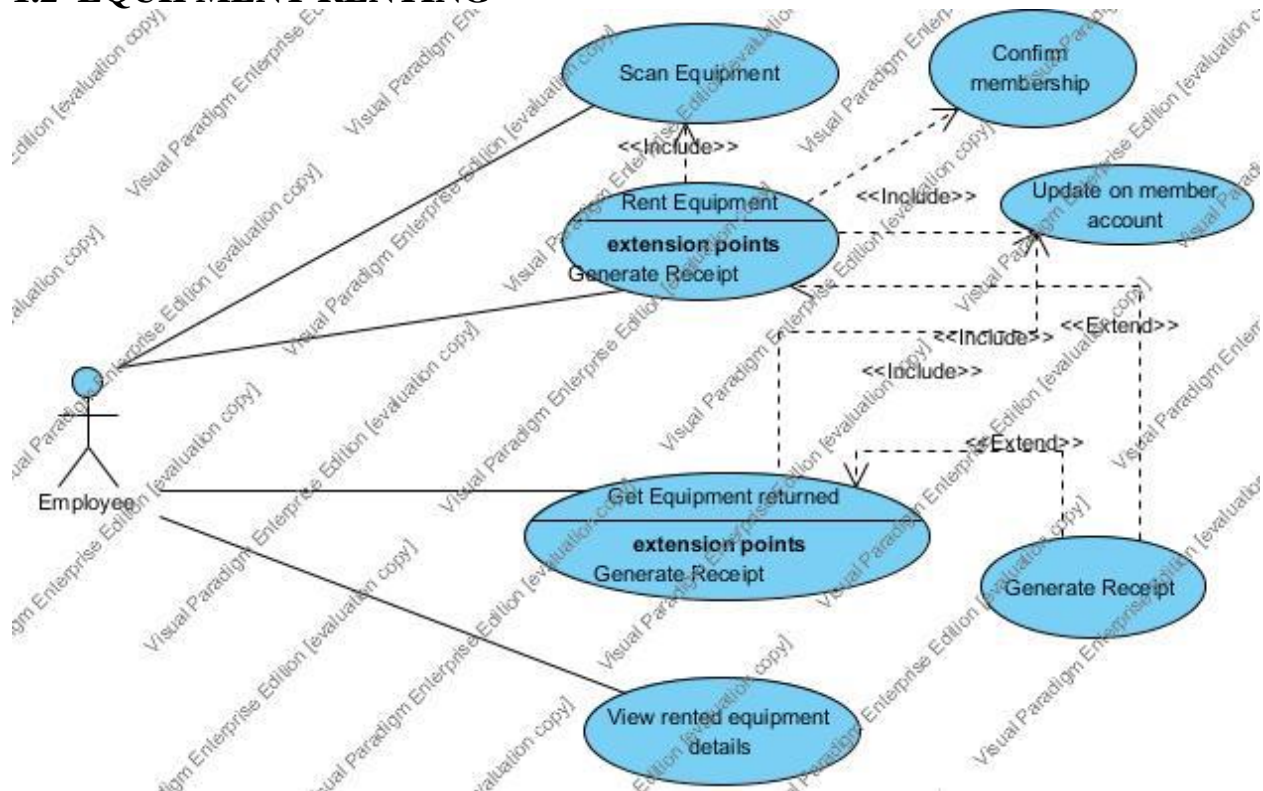

4.2	Employee	Get Equipment Returned	<ul style="list-style-type: none"> <li>Update on member account</li> </ul>	Generate receipt		M	Employee scans the equipment and takes off it from the member account
4.3	Employee	View Rented Equipment Details				H	View Rented Equipment Details: Employee can view details of rented equipment.
5.1	Employee Management	View Monthly Booking Reports				H	Employee and members can view Monthly Booking Reports
5.2	Employee Management	View Monthly Member Reports				H	Employee and members can view Monthly Member Reports
5.3	Management	View Monthly Staff Reports				H	Management can view monthly staff reports.

## USE CASE DIAGRAM

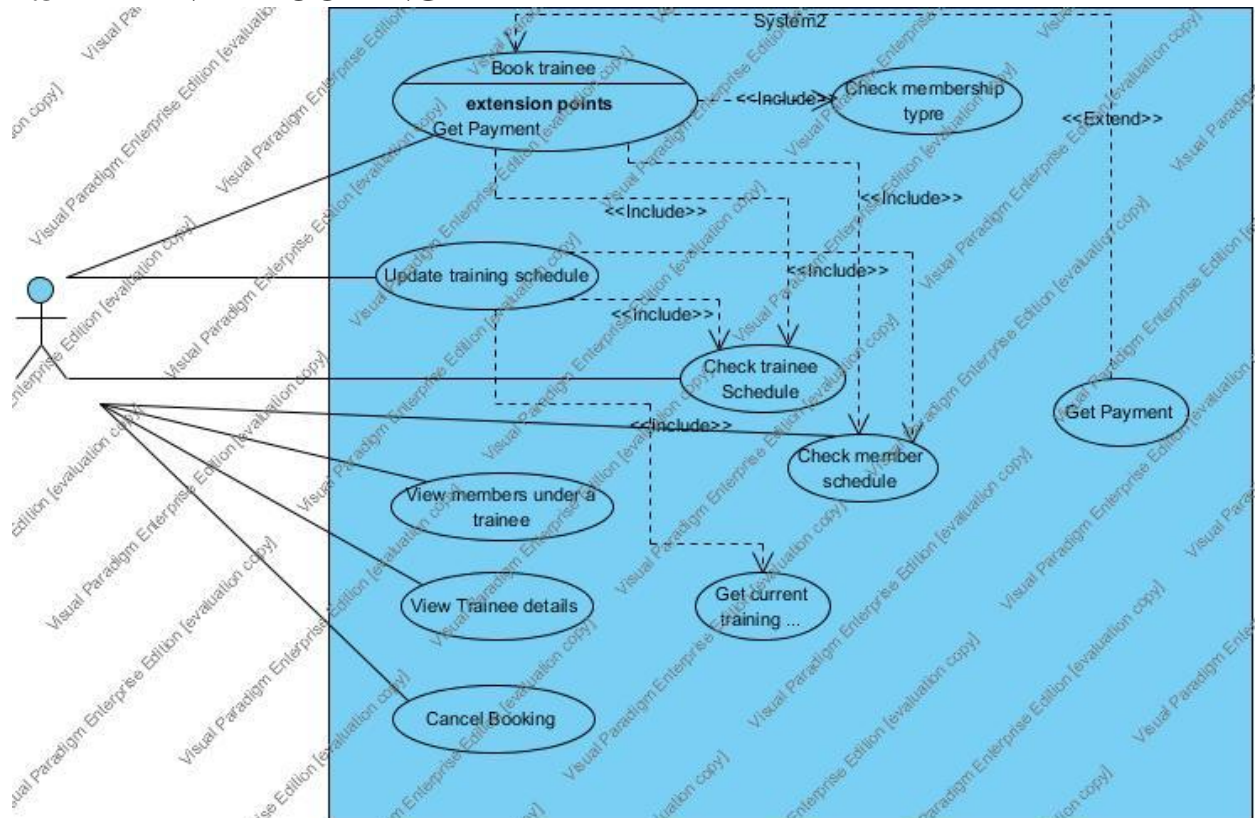

### 1.1 MEMBER REGISTRATION

### 1.2-EQUIPMENT RENTING

### 1.3-TRAINER BOOKING

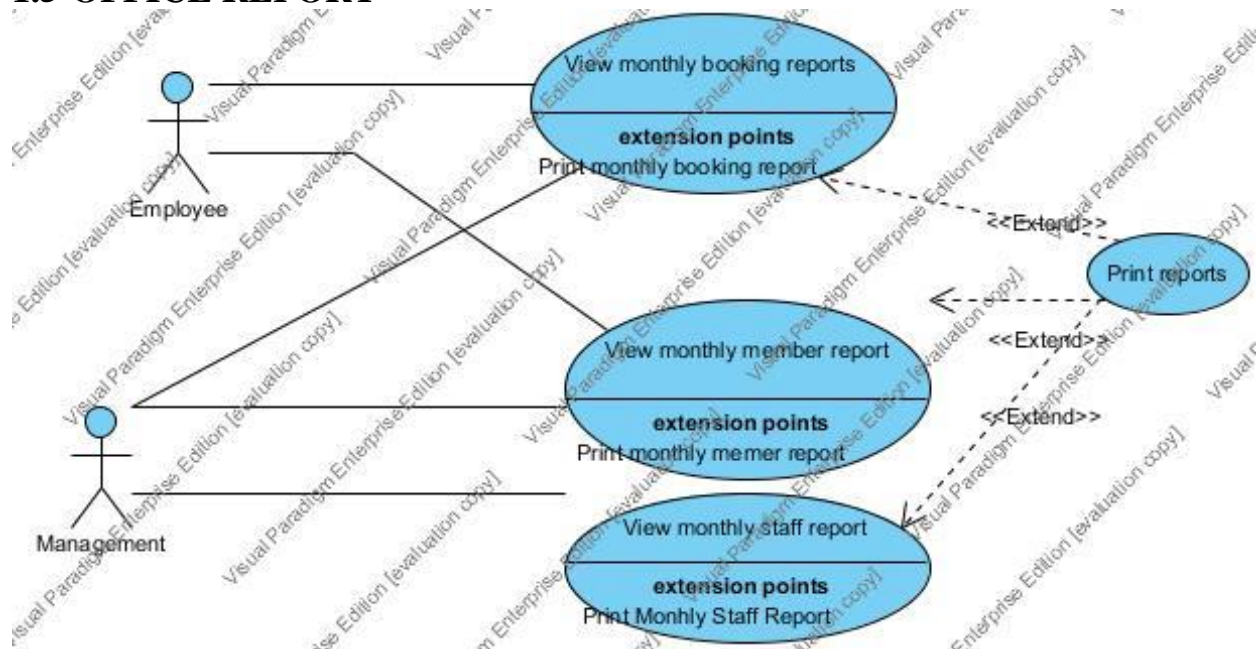

### 1.4-MEMBER/EMPLOYEE CHECK-IN

## 1.5-OFFICE REPORT

### USE CASE DESCRIPTION

#### PACKAGE 1-MEMBER REGISTRATION

##### REGISTER A MEMBER

###### 1.1

Customer can be registered as a member if he pays for the service. Member can pay monthly or pay the whole fee at once. If they pay the whole fee at once would be then treated as on contract and they can book trainer or any other session for free. When member is registered his membership card is activated. ## COMPONENT DIAGRAM

## DEPLOYMENT DIAGRAM

## List a set of technology/development tools

3-Tier Architecture	Development Tools	Comments
<b>Presentation Tier</b>	Java Adobe Photoshop CC	Developers use to create applications with a web plug-in that allows you to design and test the apps.
<b>Business Logic Tier</b>	Java XML	Major features to accommodate functional-style programming and attaining commands over logical statements.
<b>Data Tier</b>	SQL Server	It is used to store and update information that needs to be changed in various states.
